The Manufacturer and the Technical Representative shall be held responsible for any damages resulting from accidents caused by deficient manufacturing processes, raw materials and tests of each batch of dry chemical powder.

The storage of the finished product must, without exception, be carried out within the plant where it was produced until sale. The use of external storage or warehouses must be formally submitted to Bureau Veritas Argentina S.A. for evaluation and approval.

Any amendment, variation or alteration made to the audited facilities, equipment or product that originates this certificate must be formally notified in advance to Bureau Veritas Argentina S.A. for consideration and / or evaluation. BREACH OF THIS REQUIREMENT WILL INVALIDATE THIS CERTIFICATE.

Bureau Veritas Argentina S.A. only certifies that the samples and technical documentation of the product presented adjust to the in force Standard Applied, and the execution according to the certified model is the responsibility of the Manufacturer. And this delimits all liability for damages and losses that may occur due to failure or defects in the raw materials, manufacturing or tests.

The validity of this certificate expires automatically, without the need for prior formal notification from this Certification Body, upon the expiration and/or suspension of Qualifications or non-compliance with the current legal provisions of the company's location.

This license is valid until:

January 15th, 2027

At / on

Buenos Aires, January 16th, 2026

ENG. LUCAS FERNANDO BUSSO
DIVISION MANAGER
FIRE SAFETY
